

## VANGUARD ENERGY PARTNERS TEAM DONATES SOLAR SYSTEM TO AMERICAN HERO

### NOVEMBER 5, 2011

On November 5, the Colin Pascik Road to Recovery Fund, led by VFW Post 262 (Veterans of Foreign Wars), unveiled a newly renovated home for U.S. Marine LCPL Colin Pascik. LCPL Pascik, a twenty one year old resident of Monroe Township, was severely injured while on patrol in Afghanistan in August 2010. LCPL Pascik lost both legs as a result of an IED explosion. During rehabilitation at Walter Reed Medical Center, it became evident that considerable renovations would be needed to LCPL Pascik's home. An outpouring of generosity came forth from the community to help complete the project. Construction began in May 2011.

Vanguard Energy Partners, in partnership with seven other firms, donated a solar array for the renovated home. The 5.760 kW solar system will eliminate LCPL Pascik's monthly electric bill.

"In light of LCPL Pascik's service and sacrifice, our partners in this project were eager to contribute," said James LaFleur, CEO of Vanguard Energy Partners. "We're honored to donate our services for the benefit of this American hero and his family."

The solar system donation was a team effort orchestrated by Vanguard:

- Vanguard Energy Partners: donated system design, project management, racking material, electrical components, monitoring installation, O&M services and customer training
- Ferreira Construction Co., Inc.: donated labor for the installation of the racking and the solar panels
- LG Electronics: donated solar panels
- Noveda Technologies: donated monitoring system
- SMA America (manufacturer) and EnergieBau (distributor): donated inverter
- KMB Design Group: donated sealed electrical one line drawing and structural load letter
- Zensky Electrical Contracting: donated electrical installation service
